33 minutes that will rock your world!

The documentary film '180' is changing people's beliefs about abortion. Author and producer Ray Comfort uses the film to ask questions that challenge people's beliefs and ideas about abortion.

Abby Johnson, who resigned her position as the director of a Texas Planned Parenthood abortion business, has also seen the film and said pro-life advocates "must check it out," saying it is "one of the best things you will ever watch."

"Most of us know that we should be doing something to stop this horror, but the thought of protesting is a little unnerving, especially with the demonization of those who do so," says Ray Comfort. "But here is something each of us can easily do - we can give this DVD out. We can pass them out on the streets, leave copies on park benches or on seats in malls or give it to the checkout lady at the supermarket. This isn't hard to do, and it will save lives - perhaps millions of lives."
