

Imminent Rapture? Longing for Jesus to Take Us Home

This is the second article by Carl Worline on the ramped up signs of the imminent rapture. It provides a great overview of the many signs occurring world wide, pointing to the soon to occur Rapture of the Church.

'The earth continues to groan as it longs to be free of the curse that was pronounced upon it when Adam and Eve first sinned again God.'

Part Three will be added soon.

New Signs of an Imminent Rapture

By Carl Worline

Around the middle of July, I wrote an article about how there are so many signs pointing to the end of the Age of Grace that we can hardly see the road upon which we are traveling as we move ever closer to the Rapture of the church. Approximately four weeks have passed since I wrote my previous article and during that time so many new signs have popped up that I feel an urgent need to list some of the more prominent ones.

I hope this article will encourage those who are patiently watching and longing for Jesus to come and take us home. I also hope that, perhaps, somebody who is only lukewarm in their walk with the Lord will find this article and realize that it is time to get serious. We actually are the last generation of the Age of Grace.

Something big is about to happen and it is not only going to happen really, really soon; it is also going to be so spectacular that it is beyond our ability to comprehend.

Time and space only permit me to list the most significant signs that have popped up in recent weeks. There is so much more going on in the world that is pointing to an imminent rapture. Please forgive me for all that I have failed to include. I will also make a sincere attempt to leave out all of the signs I pointed out in my first article so as to have room for the newest signs that I feel require our attention.

For anybody who might be interested, the link below will take you to my original article:

<http://www.raptureready.com/soap/worline7.html>

The earth continues to groan as it longs to be free of the curse that was pronounced upon it when Adam and Eve first sinned again God. Freakish weather continues to be the new 'normal.' This freakish weather is not being caused by: global warming.

The National Oceanic and Atmospheric Administration reports that data for 2012 shows we are now experiencing a cooling trend,

and a recent report by the Met Office show that global warming actually ended 16 years ago. The arctic saw the shortest summer in recorded history.

South America is currently in a massive deep freeze as the death toll in China rises from their record heat wave. The lingering heat wave in Japan has left 19 dead and put 9,800 people in the hospital so far. Heavy rain in Pakistan has killed hundreds. Severe flooding continues in Southeast Asia, Myanmar, Thailand, and Vietnam.

In the past month more than 150,000, have been displaced by flooding in Sudan?with more rain expected in the coming days. Meanwhile, Germany is experiencing a heat wave and hailstones the size of tennis balls.

Rainfall in Iran has decreased by 58 percent as they continue to threaten to destroy Israel. There were 1,122, record cold temperatures recorded in the U.S. during a single week. The drought in New Zealand has been the most extreme in history. Natural disasters displaced 32.4 million people in 2012 with 2013 on track to be even worse.

We are currently experiencing 34 major wildfires burning across 11 western states and staggering amounts of rainfall in 16 eastern states. Severe heat is being felt across the entire nation. Dormant volcanoes are coming back to life.

The last time I checked there were 7 volcanoes that were showing new activity and 9 volcanoes with on-going activity. A volcanic eruption in Indonesia just killed 6 scientists. Earlier this year we had 4 volcanoes erupting in Russia within a range of just over 100 miles of each other. Many other volcanoes are showing a growing increase in seismic activity.

Earthquakes continue at an alarming rate and have become so common that they are seldom reported in the news. The latest one was a severe, damaging, and shallow magnitude 6.9 in New Zealand on August 15th.

Strange unidentified sounds coming from no apparent source or direction continue to be reported all over the world. The sounds are described as heavy scraping, to groaning, to booms or explosions, to a continuous hum.

A steady, droning sound that creeps in slowly in the dark of night and continues for many hours at a time has been reported in places as disparate as Taos, New Mexico; Bristol, England; and Largs, Scotland. Loud booms have been reported in 25 regions of the U.S.

In the Bible we are given a message of judgment in the last days. The prophet Hosea foretold how the land, itself would mourn: ?Therefore the land mourns, and everyone who lives in it languishes, along with the beasts of the field and the birds of the sky; and also the fish of the sea disappear? (Hosea 3:2).

Perhaps we should believe what Hosea prophesied around 710 years before Christ. I had planned to list the mass animal die-offs that have occurred in just one month picked at random this year, but the list would be too long. Please go to the link below, which lists 519 known mass animal die-offs that have occurred in 78 countries so far this year.

These are only the know occurrences. Many more unreported ones certainly exist. While you are there please take a few moments to pause and consider this incredible loss of life. God is using the animals as a warning to us of what is about to come upon mankind.

<http://www.end-times-prophecy.org/animal-deaths-birds-fish-end-times.html>

On Wednesday, August 7, 2013, Japanese officials informed us that highly radioactive water is pouring out of the damaged nuclear power plant complex at Fukushima at the rate of 300 tons per day. This highly radioactive water is systematically poisoning the entire Pacific Ocean.

There are also 400 tons of highly irradiated spent fuel rods that are tightly packed together at the moment and need to be removed as part of the clean-up. This nuclear material has the very real potential of releasing 14,000 times the amount of radiation that was released from the atomic blast at Hiroshima 68 years ago.

Despite all of the current flooding throughout the world fresh water is becoming scarce. One-third of the world's population has limited access to clean water. Egypt is ready to go to war with Ethiopia over the Nile. Pakistan is on the verge of a crisis over the lack of drinking water. Sub-Saharan Africa is in particularly dire need. In 20 African countries, more than 30 percent of the population does not have access to safe drinking water.

China and India are also experiencing unprecedented strain on their drinking water supplies. Drought in Namibia is threatening over 400,000 people with hunger. A recent report confirms that the 2013 drought in New Zealand was the worst of all time. The largest reservoir in New Mexico only contains 3 percent of the water that it did during the 1980s and 1990s.

In chapter 24 of Matthew Jesus told us that there would be signs in the heavens of His Second Coming. This seems very logical since they will be visible to the entire world. There has been a huge up-tick in solar activity, especially in the southern hemisphere of the sun.

NASA tells us the sun will reverse its magnetic polarity within the next three months and the effects will be felt far beyond the orbit of Pluto, which is the farthest planet in our solar system.

A high-speed solar wind is currently buffeting the Earth's magnetic field and this is causing a G-1 geomagnetic storm around the Earth's poles. There was a very spectacular filament eruption on the sun on August 6th.

During the middle of July there was a coronal mass ejection from our sun that was large enough to have produced a Carrington-class electromagnetic pulse (EMP) disaster. This huge pulse crossed the Earth's orbit and barely missed colliding with the Earth.

A coronal hole has formed on the sun's northern hemisphere and it is spewing solar wind into space. NASA's Solar Dynamics Observatory photographed the UV dark gap during the early hours of August 14th.

These coronal mass ejections in recent months have produced some spectacular displays of northern lights. In the meantime, the Perseid meteor show has just concluded. A new star has been discovered in the constellation Delphinus.

There was a 1,250 mile-wide hurricane at the north pole of Saturn, and a meteor struck a garbage dump in China punching a 6-foot deep hole into the ground.

Jesus told us that there would be an increase of evil in the last days. We are certainly seeing an increase of horribly sick and disgusting acts. One small recent example would be the two 18-year-old girls whose faces and upper bodies were horribly burned with acid during the recent celebration of Ramadan in Zanzibar.

I am not going to list any further examples because they are just too sickening to think about. Nevertheless, the number of these acts continues to rise dramatically.

Islam continues to spread throughout the world with a rabid vengeance. A group called the American Muslim Political Action Committee is planning a one million man Muslim march on Washington D.C. to protest the profiling and treatment of Muslims and they are also planning to hold it on September 11, the anniversary of the worst domestic massacre in American history in the name of Islam.

The Muslim world continues to demand that the rest of our planet accept Sharia Law with all of its horrors. Islam hates Jews, Christians, and all other religions with a fanatical passion that can only be described as 'supernatural.' There is also a huge increase in Muslim vs. Muslim fighting.

When the restraining influence of Christianity is snatched away from the world in the harpazo (Rapture) a single worldwide religion will form in which Islam will play a very major role. Even the leaders of Islam can sense this. Leaders in Iran are, once again, loudly proclaiming that Armageddon is at hand and to prepare for war because the arrival of the Mahdi is imminent.

Christianity continues to spiral out of control toward extinction in the Middle East and the rest of the Muslim world. Churches, homes, and businesses of Christians in Egypt have been stormed and burned. Egypt is the home to one of the oldest Christian communities in the world and also has the largest Christian population in the Middle East, totaling 8 to 12 million people. The government of Cameroon has shut down 50 Pentecostal churches and has vowed to shut down an additional 50 churches.

Christianity is fast becoming an endangered species in Nigeria where over 100 Christians are murdered each month. Jihad is emptying entire towns in Syria. Christian students in Eritrea have been beaten and imprisoned for refusing to renounce Christ. In India five women were publicly beaten for sharing the gospel.

On August 2nd three evangelists in Indonesia were sentenced to 3 years in prison for "evangelizing Muslims." U.S. State Department spokesperson, Jen Psaki, issued a press release condemning the "enemies of Islam" who were responsible for terrorist attacks at the end of Ramadan while remaining totally silent about the terrorist attacks against Christians throughout the entire Middle East and Muslim world.

Persecution of Christians here in the U.S. continues to grow in intensity. Ever since the June 26th pro-gay rulings by the U.S. Supreme Court, religious persecution of Christians within the United States has increased dramatically. One example would include people who provide services for weddings and have been particularly targeted with horrific fines and even jail time for refusing to provide services for same-sex weddings.

Another example would include an airman who wrote an article titled: "No atheists in foxholes," and was severely reprimanded for his beliefs, while atheists demanded even more severe punishment.

Anti-Semitism is also increasing. At Toronto's Al Quds Day, very young children were featured making hate filled rants against Israel and Jews.

A major sign that the Rapture and the end of the Age of Grace, has to be near is the crumbling of fundamental Christian doctrines. The name of Jesus has become a dirty word in politically correct America as well as the rest of the world.

The new pope says it is not for him to judge homosexual priests and the Vatican is even offering "time off from purgatory" for those who follow Pope Francis tweets. Are we back to selling indulgences again? Our evangelical community is turning away from opposing homosexuality in favor of a more tolerant atmosphere.

More people in the U.K. believe in aliens from outer space than do people who believe in God. Russia's President Vladimir Putin has publicly declared that Christianity has helped to make Russia a great nation.

President Putin has called for an end to worldwide persecution of Christians, while President Barack Obama has publicly declared that the United States is not a Christian nation and has remained silent about worldwide Christian persecution.

On July 31st a Muslim Imam opened a session of the United States Congress on Capitol Hill in Washington D.C. with an Islamic prayer.

Blasphemy and mocking have reached a fever pitch, just as we were told it would in the last days. A few days ago I watched a story on Fox News showing a small child praying to Obama and praising him for his greatness. I also saw an article about a Facebook post titled, "Virgin Mary Should Have Aborted."

The content of the post was equally as offensive. Similar pages are becoming increasingly more common. I will not list any further examples because I find them so offensive. We are very definitely in the last of the last days.

Many will argue that all sins are equally offensive to God, but I have always felt that homosexuality in all of its forms is particularly

offensive to our Lord. Perhaps this is why the supernatural forces that are at work in the world against us are so intensely determined to force the homosexual agenda upon the rest of us.

Former Archbishop Desmond Tutu has declared that he would prefer hell, over a 'homophobic' heaven. Gays are set to sue the Church of England for refusing to perform same-sex weddings. Churches in the United States now fear lawsuits over gay weddings as well.

A proposed law in San Antonio, Texas, would bar Christians, along with anybody else who opposes homosexuality, from holding public office or obtaining a city contract. Rhode Island and Minnesota have just legalized gay marriage, bringing the total to 13 states in the U.S.

Tel Aviv has been one of the most-friendly cities in the world for pro-gay couples in the world and Jerusalem, the city that God claims for Himself, just held a parade to support pro-LGBT legislation in Israel. America has granted gay spouses equal visa privileges.

The U.S. military has recently announced that same-sex spouses will gain all of the benefits open to opposite-sex spouses by September 3rd. This includes healthcare and housing, and will be open to any military member with a valid marriage certificate.

While all of this has been going on a California committee approved legislation, which would cause any non-profit organization that does not embrace homosexuals to lose their tax-exempt status.

Sexual perversion continues to increase as well. On August 11, California's Democratic governor, Jerry Brown, signed into law the 'bathroom bill' mandating schools to allow boys to use the girls restrooms and locker rooms, and vice-versa.

When it comes to Internet porn, a recent poll found that the U.S. is well ahead of the rest of the nations of the world and that we are the host of 60 percent of the world's pornographic websites. The same poll found that 30 percent of all Internet traffic worldwide involves pornographic sites, and that 66 percent of the pornography in the United States originates in California.

Wars and the rumors of wars are one of the major signs we were told to watch for as a sign of the end of the age. Russia recently held the biggest war games in decades, involving 160,000 troops.

Well over 4 million people have been displaced, by the fighting in Syria, as the civil war in that nation lingers on. Chemical weapons have been used in the conflict. The fighting in Syria is becoming global as more and more nations send weapons and troops to participate in the fighting.

Zimbabwe's government has signed an agreement to sell uranium to Iran. Japan just unveiled its largest warship since WWII. Bitter enemies India and Pakistan, both possess nuclear weapons, are now exchanging gunfire across their borders.

We have just learned that 400 advanced hand-held surface-to-air missiles were stolen from Benghazi and have fallen into the hands of radical Islamists.

Britain's busiest airport, Heathrow, has been put on high terror alert after 'credible' intelligence emerged that al-Qaeda is plotting to bring down airliners flying out of London with the help of female suicide bombers with explosives concealed in breast implants.

The IDF reports that Hezbollah has a weapons cache of 60,000 rockets and that all of Israel is now in range. Israel is now facing an on-coming al-Qaeda on all 3 Israeli borders: Golan, Lebanon, and Sinai. Gaza has resumed firing rockets into Israel and Israel has resumed airstrikes against the terrorists who fire them.

Palestinian President Mahmoud Abbas has declared that his goal is to have 'not a single Israeli' in a future Palestinian state.

The Palestinians have stated clearly and frequently that they will not compromise in their goal to steal all of the land of Israel and to completely once-and-for-all-time eliminate all traces of the nation of Israel and to kill every single Jew in the world. They refuse to recognize the very existence of Israel.

At the same time Israel continues to bomb yet another weapons convoy in Syria and has announced plans to begin the next block of homes in the West Bank, giving preliminary approval for 1,187 new settler homes. Instead of standing with our supposed friend and ally, the U.S. State Department has bitterly criticized Israel for building settlements in the disputed territory.

Secretary of State Kerry has publicly and firmly declared that the United States views all settlements in the disputed territory as illegitimate and illegal. America is the referee who is pushing (shoving) Israel to divide their land. God has promised in the Bible that we will be held accountable for harming Israel.

After assuring us for months that al-Qaeda has been decimated, the United States temporarily closed 21 embassies all over the Middle East and other parts of the world over fear of an imminent attack by al-Qaeda while violence and murders all over Iraq and Afghanistan are leading us to the realization that all of our fallen and wounded soldiers, and the unimaginable amount of money that we spend, were lost in vain.

Our president has assured us that he has al-Qaeda "on the run." On this point he is absolutely correct. Al-Qaeda is definitely on the run. They are running straight at us with their bayonets fixed and wearing their explosive vests as they scream "Allah Akbar."

We are told that one sign of the coming Rapture will be the world in a political upheaval. The latest death toll from the uprising in Egypt has now passed 800 with the number of wounded well into the thousands. It will get much worse in the coming days. On August 15th the military backed government of Egypt authorized the further use of live ammunition.

Anti-U.S. hostility is rapidly increasing in Egypt. They barely tolerate our existence as they soak up billions of dollars of American foreign aid. The new president of Egypt has even refused to take calls from Obama. We are on the very verge of the fulfillment of Isaiah 19.

Meanwhile, CNN reports that the CIA is going to unprecedented lengths to insure that whatever it was doing in Benghazi remains secret, even going so far as to require monthly polygraph examinations of those who know the truth.

Signs of an imminent worldwide economic collapse also point to a Rapture occurring at any moment. All of the nations of the world are bankrupt to one degree or another. Each nation holds the others up in a worldwide Ponzi scheme that could have only existed this long through divine intervention.

When the restraining force of our Lord is removed everything will collapse. The only solution will be a worldwide currency with a mandatory and infallible means of personal identification, such as a biometric scan or an RFID chip.

Right now over 97 percent of the money in the world exists only in the electronic memory of the world's banking computers. Less than 3 percent of the money in the world is in the form of paper, coins, or bars of precious metal. Traders are talking about a worldwide gold conspiracy and there is evidence to back that up.

We have record high demand for physical gold. Earlier this year when the Germans asked for 300 metric tons of their gold from the Federal Reserve in New York they were told that it would take seven years for the Fed to come up with it.

This set off alarm bells all over the world. Right now the bullion banks are experiencing unprecedented difficulties in coming up with the physical gold and physical silver that they are supposed to have. The stock market continues to set record highs yet nothing has been fixed.

Something is very wrong here. There have been multiple occurrences of the "Hindenburg Omen" in recent weeks, which many

analysts believe is a serious portent of doom in the stock market.

Nearly all of Mexico lives in poverty. Similar to what Cypress did, Australia is now proposing a levy on bank accounts to pay government debts. Unemployment just passed 27.6 percent in Greece. Japan's national debt is at \$10.5 trillion dollars and is poised to set off a global financial panic at any moment.

Currently, 50 percent of all government tax revenue in Japan goes to interest payment on its debt. Zimbabwe's President, Robert Mugabe, has claimed a mandate for 'black empowerment' and has begun seizing all foreign and white-owned assets in the country.

Signs of an imminent financial collapse in America are equally as stark. Detroit can no longer pay its bills and has filed for the largest municipal bankruptcy in U.S. history. Two Americans are enrolled in food stamps for every job our president has created.

A recent Associated Press survey found 4 out of 5 U.S. adults struggle with joblessness, near poverty, or reliance on welfare for at least part of their lives. California is releasing 9,600 inmates from state prisons to reduce chronic, severe overcrowding and to save money.

In a recent report black teen unemployment is at 41.6 percent. The U.S. debt obligation has now passed \$70 trillion dollars. And finally, Americans living overseas are renouncing their citizenship in record numbers in order to avoid oppressive taxes being imposed on those living outside the U.S.

The American military is collapsing. Due to budget cuts brought on by sequestration the Navy has decided that it cannot afford to fix the Los Angeles class nuclear submarine Miami and is, therefore, decommissioning it. The Miami was damaged in May 2012 by a fire while undergoing repairs in dry dock.

We have aircraft carriers in port because we cannot afford to repair or refuel them. The Air Force Space Command has announced that it is shutting down its space surveillance system that detects and tracks satellites and space debris by October 1st due to budget cuts resulting from sequestration.

This system has been operating since 1961 and is now being shut down because we can no longer afford the \$14 million dollars it costs to operate each year. So far this year 2 of the 3 intercontinental ballistic missile wings of the American military have miserably failed safety and operational evaluations, calling into serious question our ability to defend our nation in the event of a nuclear strike against us.

However, our military has decided that it could afford to host homosexual drag queens as part of a 'diversity day' event at a Los Angeles Air Force Base.

At the same time a 19-year-veteran of the Air Force said that he was relieved of his duties after he disagreed with his openly gay commander when she wanted to severely punish an instructor who had expressed religious objections to homosexuality. Soldiers should not be forced to embrace homosexuality in order to serve our nation.

America is not mentioned in biblical end-time prophecy. Perhaps that is due to America's political collapse, which has already begun. Our current administration has been rocked by the Benghazi scandal, the IRS scandal, the Fast and Furious scandal, and the Associated Press scandal. As a result, polls show growing support for impeachment.

America has shown a total lack of leadership in recent world crisis. The world is on the brink of war over tensions in the Middle East. When Egypt first erupted in chaos our president went golfing and our Secretary of State took the day off to sail on his private yacht. Neither lifted a finger or said a word to help.

As Egypt descends further into civil war our president continues to play golf on his vacation in Martha's Vineyard. A former aide has revealed this week that President Obama played cards during the bin Laden raid, which he was later so quick to claim the credit

for its success.

In an interview with the New York Times, President Obama suggested that you need to be a lawyer: in order to be able know what the Constitution actually says. President Obama held a Ramadan dinner at the White House while the U.S. is at war with radical Islam ? the religion that tells every one of its members to kill every single Christian and Jew.

Obama canceled his ?summit? meeting with Russian President Putin amid tensions over Russia granting temporary asylum to Edward Snowden. Apparently our president did not feel that this ?summit? meeting was very important.

The approval rating for our president has now dropped to 41 percent.

Lawyers and politicians are now considered to be the bottom feeders of our society. We currently have a large number of politicians who are creating headlines for their sexual misconduct. Many Congressmen admit to passing laws they have not even read. What's even worse, many of our political leaders, including our president, are refusing to enforce the laws they do not like.

Former Secretary of State Hillary Clinton was literally screaming at members of Congress two days after the Benghazi attack for daring to call the tragedy ?terrorism.?

America runs off-shore-prisons, including but certainly not limited to Guantanamo Bay in Cuba, where inmates have been denied all of the rights guaranteed by our Constitution. Even worse, America has tortured prisoners in these off-shore-prisons and no amount of ?spin? can ever change or justify it.

Our integrity has a serious stain upon it that can never be removed and we can no longer claim the moral-high-ground in judging any other nation. America has become something that our Founding Fathers never intended it to be.

America is collapsing morally. Recent polls show that the U.S. marriage rate has dropped to a new low. A newly released video shows college students signing a petition: to legalize abortion after a child is born. Time magazine is promoting the childless lifestyle as the path to ?the good life? for U.S. couples.

More than a dozen leading baseball stars have just been given severe fines and suspensions from playing for illegal drug use. And an abortion clinic in Florida is now sending coupons to low income women offering a \$50 savings on the cost of an abortion if the abortion is performed on a Sunday.

Political correctness is destroying America. An elementary school in Tennessee has banned pork so as not to offend Muslims. The Missouri State Fair has permanently banned a rodeo clown because he wore an Obama mask during a performance.

A high school track team was disqualified because one of its runners made a gesture thanking God as he crossed the finish line. A teacher in New Jersey was fired for giving a Bible to a student who asked for one. A Florida police officer was fired because he called Travon Martin ?a thug? on Facebook.

In San Francisco authorities are installing ?privacy screens? on computers in public libraries so perverts can view pornography without disturbing others. The Obama administration has banned any government training materials that link radical Islam with terrorism and is purging these references from all of its old materials.

And in a new Army training manual U.S. soldiers are being warned to avoid all criticism of pedophiles in order to avoid offending Muslims. After all, Mohammad did marry his favorite wife, Aisha, when she was only 6 years old.

Our government continues to conspire against its people. In my last article I talked about the 2 billion (plus) rounds of ammunition our government is hoarding, how the IRS is now training with M-16 full automatic assault rifles, the reported 2,700 armored personnel carriers it has purchased, and so much more.

However, in the last couple of weeks I did note that the National Ocean and Atmospheric Administration just purchased 72,000 rounds of hollow-point ammunition. Obama's federal government is now using automobile license plate readers to track the movement of U.S. motor vehicles. Even police departments in small towns are now tooling up with elite military hardware.

There is also the ever-increasing number of reports in the news of police in America turning into ruthless thugs. In one case, a man innocently searched the words "pressure cooker" on the Internet and another member of his family innocently searched the words "back pack," only to find six armed agents knocking on his door shortly thereafter.

President Obama is set to sign the UN Arms Treaty this month while Congress is in recess. This will lead to mandatory registration of all firearms in the U.S.

In order to take over the world: The Antichrist will need to know as much as possible about every single individual. Our government is currently building a mega-data-base on not only all of its citizens, but all of the people of the world. You've never heard of XKeyscore, but it definitely knows you.

The National Security Agency's top-secret program essentially makes available everything you've ever done on the Internet?browsing history, searches, content of your emails, online chats, even your metadata?all at the tap of the keyboard. ...XKeyscore is its "widest reaching" system for developing intelligence from the Internet.

PowerPoint training materials obtained by the Guardian show how analysts could use the system to mine sprawling agency databases consisting of a vast reservoir of data. At least 41 billion records were collected and stored in a single 30-day period in 2012, according to the report, which also says XKeyscore collects more than 20 terabytes of information daily, including emails, chats, social media interactions, and even browsing histories?all in real-time.

The world is furious at us after learning of the extent of our spying on them from the Edward Snowden leaks regarding our mass surveillance programs. Germany canceled a decades long agreement with us to share vital intelligence information. Recently released documents by Edward Snowden reveal our president lied about our government spying on its citizens.

The National Security Agency has broken privacy rules or overstepped its legal authority thousands of times each year since Congress granted the agency broad new powers in 2008. The government's challenge to us through all of this has been that if we are not doing anything wrong we have nothing to hide and, therefore, no reason to object.

If we want to know where we are on God's end-time timeline we need to look at what is going on in Israel. The European Union has redrawn Israel's borders to the pre-1967 lines and has issued a directive barring all transactions with areas outside those borders. The UN has declared Israel to be an "occupier."

The new ruler of Iran, Hassan Rouhani, appears to be as rabidly fanatical about the destruction of Israel as the former leader, Mahmoud Ahmadinejad. As I mentioned a few moments ago, Secretary of State Kerry has declared, "The United States of America views all of the settlements as illegal. That is the policy of the United States."

We have touched the "apple of God's eye" in a way that has surely made God very, very angry with us. Our own Supreme Court has struck down a law allowing Americans born in Jerusalem to list Israel on their passport as their place of birth.

We have also publicly stated that the U.S. guarantees that Israel's pre-1967 borders will be the basis for renewed peace talks with the Palestinians. Israel is very angry with the U.S. for revealing to the world that Israel used its submarines to launch cruise missiles that destroyed Russian made anti-aircraft missiles being delivered to the Syrians for use against Israel.

Obama has leaked this information to the world knowing full well that it invites retaliation against Israel, thus putting Israel in real danger. The Temple Mount is routinely being closed off to all Jews to appease Muslims who threaten to riot.

Jews were banned from Temple Mount for most of the month of Ramadan.

What I find most frightening of all are the remarks by Israel's Deputy Foreign Minister, which seem to indicate that Prime Minister Netanyahu is willing to relinquish up to 86 percent of the West Bank in a land-for-peace deal that has no possibility of ever succeeding, and every possibility of angering God.

The black horse of the Apocalypse looms just over the horizon as world hunger increases. President Obama just signed an order banning ammonium nitrate fertilizers in the United States. This will produce a very severe negative impact on the food grown on our nation's farmlands.

Many parts of the world continue to ban genetically engineered crops. France has just announced that it will continue its ban on genetically modified corn. The war in Syria has destroyed half of their wheat crop. Freakish weather has destroyed a significant portion of the current world's food supply.

The Bible tells us that there will be an increase in disease and pestilence in the last days. Anthrax is spreading over the northern region of Tajikistan. A plague-infected squirrel has been found in a California campground. Honduras has declared an emergency over dengue fever.

Hog producers are battling a virus that has killed piglets by the thousands and has a mortality rate of up to 100 percent. China's bird flu has now started passing from human to human. There is a new mystery virus in the Middle East that is linked to camels.

A boy in Florida has recently been infected with a brain-eating amoeba. The east coast of the United States is being overrun with a plague of cicadas. Billions of locust eggs are hatching in the Negev desert.

Israel was hit by a plague of locusts just before Passover (That just has to be prophetic somehow!), and the capital of Bosnia has been hit by a plague of flies. One-third of the world's food is destroyed by pestilence.

Advances in technology also point to our being in a time that closely parallels the "Days of Noah," when the gene pool of mankind and the earth was polluted by angels who rebelled against God and caused God to be so angry that He destroyed the world with a flood. We have hacked our way past the firewalls of God's computer and have gained access to the secrets of DNA that contain the codes of life.

Foolishly, we have tampered with these codes producing human-animal hybrids created in laboratories all over the planet. Scientists have just announced their most recent accomplishments of implanting false memories in mice and producing rabbits that glow in the dark. Human genes have been implanted in many different animals. One does not need the gift of prophecy to know that God is not going to tolerate this flagrant disobedience much longer.

Jesus told us that the Great Tribulation would start at the 3.5 year-point of Daniel's 70th "week" when the Antichrist stands in the Temple and declares himself, to be god. Therefore, there will have to be temple for him to stand in. The discussions on rebuilding the Temple are starting to get serious despite severe Islamic objections. The Israeli government is now funding the Temple Mount Institute and other organizations in their efforts to someday very soon rebuild the Temple.

I firmly believe that UFOs will play a significant role in end-time events and that sinister supernatural forces have at been at work ever since the incident at Roswell in 1947, and even back to the earliest days of civilization, to plant the seeds in the mind of mankind that are necessary to carry out their evil plan.

There has been a huge up-tick in recent UFO sightings and in cattle mutilations, where parts of the cattle are removed with the surgical precision we are scarcely able to duplicate today. The beings that perform these mutilations go to great lengths to insure they are never seen, and yet they deliberately leave the carcasses in places where they are certain to be found. Why?

There are other miscellaneous signs at we are at the end. Water has turned blood red in 9 waterways around the world during the past 2 years. Massive sinkholes continue to appear all over the world. The latest one opened up a hole 200 feet wide and 90 feet deep for no apparent reason, and it continues to expand.

Why are these sinkholes gobbling up cars, homes, and people? Is the earth angry with us, or is it trying to tell us something?

In Revelation 3:3 Jesus commanded us to watch for His return. He also warned us that if we do not watch He will come upon us as unexpectedly as a thief in the night and if we do not watch, we will not know the day or hour of His return.

Paul told the Thessalonians in his first letter to them to watch for the Lord's return in the clouds, when the dead in Christ will rise first when the trumpet blows.

The bulk of chapter 24 of the book of Matthew deals with Jesus answer when asked what the signs of his return will be. Chapter 25 contains the parable of the 10 virgins and the importance of watching and being prepared for His return.

Over the centuries there has been much debate as to whether or not we can know the day or hour, but we can certainly know the season. We have that on the highest authority.

Never before in history has there been such an incredible number of signs that something big is about to happen, especially when all of these signs are occurring simultaneously. Many in the unbelieving world react with anger whenever the Rapture is mentioned because it is becoming increasingly impossible to deny.

All of humanity can sense it. Something really, really big is about to happen and it is going to happen really, really soon. Stockpiling water, food, medicine, and ammunition is not the answer.

The answer lays in your own heart and where you stand with God.
