

## Israeli preemptive strike against Iran's nuclear program

### **?WE ARE ENTERING THE MOST FATEFUL 50 DAYS? SINCE YOM KIPPUR WAR, SAYS SENIOR ISRAELI OFFICIAL:**

Evidence continues to mount that an Israeli preemptive strike against Iran's nuclear program is increasingly likely before the U.S. elections in November. In just five days, the 2012 Epicenter Conference will begin. There, I will deliver the opening address on ?The State of the Epicenter,? review what we know about the Iranian nuclear threat and the prospect of war, brief you on the steps The Joshua Fund has taken to prepare for war, and discuss what Christians can and should do to stand with Israel at this critical time.

Please make plans to attend the Epicenter Conference in Albuquerque, New Mexico, next week ? or watch the conference live (or on demand) at [www.epicenterconference.com](http://www.epicenterconference.com).
